Site Goal:

Usage of online market websites has increased over the years for various reasons, including rising stress levels, inefficient use of both time and money during in-person shopping, and the growing difficulty for sellers to market their products in person. VENDORVISTA is designed to improve this process by making it more efficient, reducing stress levels, and optimizing the use of money. This, in turn, enhances the experience for both users and sellers.

Site Audience:

Our site is designed for individuals who frequently shop from several online businesses and can use the web to evaluate the best quality and most affordable offers. Moreover, our site will focus on online vendors who utilize the web as a way of promoting their products.

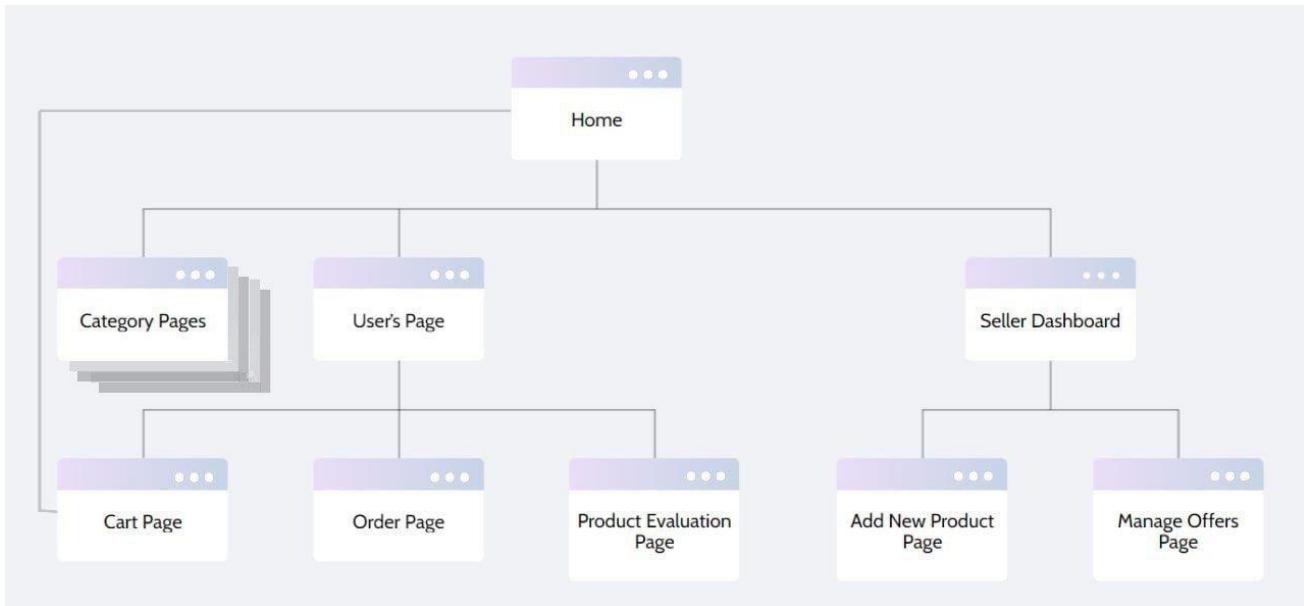

Function Requirement:

- Displays promotional offers and customer reviews.
- Showcases products with images, names, prices, “Add to Cart” button, and sorting options.
- Shows user’s cart and order history, with links to detailed views and evaluations.
- Lists chosen products with options to update, remove, and select for checkout, showing the total price.
- Displays current and past orders with product details, purchase date, delivery confirmation, and order number.
- Allows users to rate products, including ratings, comments, and order selection.
- Lists seller’s products with options to add new products and manage listings.
- Provides a form for sellers to add products with image, name, description, price, quantity, and category fields.
- Manages promotional offers with options to add, delete, and select applicable products.
